PROFILE

Email and lifecycle marketing specialist with nearly seven years in marketing, from copywriting and content to automated customer journeys. My writing started with **KYNO**, the film platform I co-founded in 2019 and grew to 14,000+ followers with a 10-person team. I spent 16 months in iGaming affiliate marketing across 10+ European markets, and I now build lifecycle programmes end to end: onboarding, retention and reactivation journeys, segmentation, A/B testing and performance analysis.

I design **AI-assisted workflows** where AI drafts, localises and analyses, and a person reviews before anything goes out.

Based in Tallinn and learning Estonian, I'm looking for a role where I can own the customer journey and grow with the team long-term.
